

Reliable
IT Solutions

Corporate Presentation

Your Strategic Partner

BT PLUS was established in 2012 in Istanbul. We are specialized in Microsoft solutions and providing services on Cloud Technologies, Efficiency Projects, Information Security (KVKK and ISO 27001) and IT Consultancy including system integration processes for our Customers.

Depending on the demand of Customers, the current system analysis is made by our experienced technical team and, finally an analysis report is created. Solution scenarios are developed based on the determined targets and analysis report. With the leading partners in Turkey; HP Turkey, Dell Turkey, Microsoft Turkey etc., we offer solutions that consist of their hardware, software and services.

We work to ensure the organizations focus their own business and operates fluently by managing and maintaining their IT infrastructure. On the other hand, doing business but in a secure way is inevitable for anyone. Security is the key point now and in the future for sustainable success.

Our Projects and References

Our special projects are our greatest source of pride for the demands of our customers.

By managing your requests from a single point up to now effectively, we have provided time and cost savings by producing fast solutions. We care management and maintenance of processes to ensure their continuity, as much as the installation and integration of the systems. Thus, we create a comfort zone for our customers and allow them to concentrate on their own activities.

For the systems, hardware, software and services we need in the project, we use our strong ecosystem including the manufacturers and distributors we have been working together for years.
